

Desktop Studio User Guide

This section provides a guide on how to develop **Intelligent Robotic Process Automation** projects using the **Desktop Studio** IDE.

Overview

- [Main Concepts of the Desktop Studio](#)
- [The Studio Integration Environment](#)
- [Desktop Studio Settings](#)

Project Management

- [Project Management](#)
- [Environment Management](#)

Declaration of Applications, Pages, and Items

- [Explorer Perspective Description](#)
- [Application Declaration](#)
- [Page Declaration](#)
- [Item Declaration](#)
- [Criteria Management](#)
- [Using Recognition](#)

Designing Automation Workflow

(Requires V3.3 and upper)

- [Principles of Workflow Design](#)
- [The Workflow Perspective Panel](#)
- [Main Steps in Creating a Workflow](#)
- [Managing Context Structure](#)
- [Management of Generated Code](#)
- [Advanced Workflow Patterns: Loops, Switch, Reuse Steps, and so on](#)
- [SAP Intelligent RPA Activities Reference Guide](#)

UI Design

(Requires V3.4 and upper)

- [The UI Designer Perspective](#)

Editing Automation Scripts

- [The Editor Perspective](#)
- [Script Management](#)
- [Searching \(Find / Replace\) Features](#)
- [Navigation Features](#)
- [Help Features](#)

Compiling, Debugging, and Testing

- [Compilation with Desktop Studio](#)
- [Debug your Code with the Script Debugger](#)
- [Debug and Test with the Debugger](#)
- [Debug Offline with DebugSessions](#)

Appendices

- [TraceViewer User Guide](#)
- [Desktop Studio Commands Reference](#)
- [Code Snippets Reference](#)
- [Studio Configuration](#)
- [Project Structure and Organization](#)
